

Wakesport Deutschland e.V.(WSD)

Germans` first "Wakeboarders only" association.

Wakeboarding in Germany, usually known for its cable scene now got hope for riders who ride behind the boat. A couple of contest riders found an association to represent their interests and to support WAKEboarding in its original meaning. Within some months (the association was found in July, 2004) a community of all wake loving sportsmen including wakeskaters, wakesurfers and hydrofoilers found their place in this fast growing organisation. Unfortunately conditions aren't good in Germany: 35 crowded "waterski areas" stand opposite to nearly 50 cable parks. In addition to that there's only one real contest in Germany. WSD's committee declared that they're willing to change this situation. The very beginning is already made by the "Wakeboard City Jam" on the 13<sup>th</sup> of March in Kitzingen (near Würzburg). This invitational contest should be only understood as the initiation of an event series. The jam contest is followed by a handful of wakeboard shows throughout the year. A lot of Wakeboard camps are also planned yet, to spread the spirit of wakeboarding all over the country.

Beside WSD's pretension to make Wakeboarding more popular in Germany, every international connection is welcome. WSD is open minded to cooperate with any european partner for common contests, camps or demo sessions.
